

Douglass Coated Fabric Disinfectant Guide

Updated 4/7/21

The coated fabrics listed in this guide have been organized by finish and/or manufacturer. Many of the following disinfectants listed are on the CDCs approved list (<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>) that continues to grow. and have shown to do minimal to no damage when used appropriately on patterns marked as recommended. Recommended=Little to no discoloration in labortory situations. Not Recomend=Major discoloration happened in labortory situations. Empty Cell= has not been tested

Douglass Cleaning and Disinfecting FAQ can be found on our website(<http://bit.ly/DICleaningandDisinfectingFAQ>).

Important Notes:

Cleaners/Disinfectants should only be used in the dilutions recommended by the manufacturer and never in concentrated form.

After each application, disinfectants should be thoughtly wiped off with clean water and dried with a clean towel. Any chemical resisdue left on a surface can cause discoloration and degradation to the surface of the fabric.
