

Absecon Design Match Library

For decades, Absecon Mills produced distinctive woven upholstery fabrics that became trusted standards throughout the contract furniture industry. While the closure of the mill marked the end of many well-known patterns, it also created an opportunity to identify new fabrics that capture the same design intent, texture, color story, and performance.

The Absecon Design Match Library has been developed to help designers, dealers, and customer service professionals quickly identify recommended alternatives for discontinued Absecon patterns. These recommendations are based on the overall aesthetic, construction, texture, and intended application of each pattern. While no replacement is an exact duplicate, each suggested fabric has been carefully selected to provide a comparable design solution.

Because color, texture, scale, and hand can vary from fabric to fabric, we strongly recommend requesting a sample before placing your order. Reviewing a physical sample alongside your original specification is the best way to ensure the selected alternative meets your project's design and performance expectations.

As we continue to evaluate new products and develop additional matches, this library will be updated to provide the most current recommendations.
